

# PDS Project Readme

Gaurav Agrawal (ga1380) & Ronak Fofaliya (rf1999)

I am using Xampp server 7.3.11 which uses MariaDB (MySQL) and Php 7.3.11, so below readme adheres to the same.

Also, I am using bootstrap (online version) to beautify the look and feel of the pages.

Please extract the file [ga1380-rf1999-pdsproject.zip](#)

There would be 1 folder and 4 files present in the folder “[ga1380-rf1999-pdsproject](#)”

**Schema.sql** to create the underlying schema

**Insert.sql** to enter pre-populated HOODS & BLOCKS.

**Script.sql** to execute needed procedures and triggers.

**README.pdf** to explain the code and execution.

**pro4** (FOLDER)

- css
  - style.css
- img
  - logo.png
  - map.png
  - profile.png
- include
  - acceptFriend.php
  - addFriend.php
  - addNeighbour.php
  - addrUpdate.php
  - approvalRequest.php
  - blockByCity.php
  - createThread.php
  - footer.php
  - form\_compose.php
  - header.php
  - mapMarkers.php
  - markAsRead.php
  - nav.php
  - rejectFriend.php
  - signUpMap.php
  - threadReply.php
  - updateAddGetBlock.php
- js
- uploads
- address.php
- approval.php
- config.php
- confirmation.php

- contact.php
- friends.php
- index.php
- login.php
- logout.php
- messages.php
- neighbours.php
- profile.php
- signup.php
- welcome.php

**Execution Process:**

- Place the folder “pro4” under htdocs folder at Xampp installation root folder.
- Execute all three SQL files on the server.
- After starting the apache and database server (port: 3307), go to “<http://localhost/pro4/>” in the browser, index.php is automatically rendered.
